FATHER'S GROWING OLD, JOHN!

BY F. G. WOOD.

Our father's growing old, John!
His eyes are growing dim,
And grey are on his shoulders laid,
A heavy weight for him.

And you are a young and hale,
And such a stalwart man,
And such a stalwart man,
And such a stalwart man.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!

At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

He used to take the broad John!
At cradle and the plough,
And carried over his shoulders the seed
That trickled down a furrow.

FATE OF SIR JOHN FRANKLIN'S EXPEDITION.

RETURN OF CAPT. McCLECK, R. N.

The first screw discovery vessel, (Captain
McCleck) which was sent to the Arctic
regions at the expense of Lady Franklin,
arrived off the Isle of Wight on Wednes-
day. On landing Captain McCleck at
once came on by train to London, bring-
ing with him two cases containing relics of
the long-missing expedition of Sir John
Franklin. The following from the Admi-
rality was forwarded to the Times for publi-
cation.

"Sept. 22, 10.30 a.m.
The Secretary of the Admiralty pre-
sents his compliments to the Editor of the
Evening Mail, and forwards the accom-
panying letter for insertion."

"Yours Fox, R. V. S.
Sir,—I beg you will inform the Lords
Commissioners of the Admiralty of the
safe return to the country of Lady Frank-
lin's Final Searching Expedition, which I
had the honor to conduct.

Their Lordships will rejoice to hear that
our endeavours to ascertain the fate of the
Franklin Expedition have met with com-
plete success.

At Point Victory, upon the north-west
coast of King William's Island, a record
has been found, dated the 29th of April,
1848, and signed by Captain Crozier and
First Officer, by which we were informed that
His Majesty's ships Erebus and Terror
were abandoned on the 22d of April, 1848
in the ice, five leagues to the N. N. W. and
not far from the coast, and all amounting
to 105 souls, under the command of Cap-
tain Crozier, were proceeding to the Great
Fish River. Sir John Franklin had died on
the 11th of June, 1847.

Many deeply interesting relics of our
lost countrymen have been picked up upon
the western shore of King William's Island
and others obtained from the Esquimaux
by whom we were informed that subse-
quent to their abandonment one ship was
crushed and sunk by the ice, and the other
fired on shore, where the last ever seen
been, affording them an almost inexhaust-
ible mine of wealth.

Striving unable to penetrate beyond Bel-
long Cape, the Erebus and Terror, a record
has been found, dated the 29th of April,
1848, and signed by Captain Crozier and
First Officer, by which we were informed that
His Majesty's ships Erebus and Terror
were abandoned on the 22d of April, 1848
in the ice, five leagues to the N. N. W. and
not far from the coast, and all amounting
to 105 souls, under the command of Cap-
tain Crozier, were proceeding to the Great
Fish River. Sir John Franklin had died on
the 11th of June, 1847.

DR. McLANE'S CELEBRATED VERMIFUGE AND LIVER PILLS.

WE beg leave to call the attention of the Trade, and more especially the Physicians of the country, to two of the most popular remedies now before the public.

We refer to
Dr. McLANE'S Celebrated Vermifuge and Liver Pills.
We do not recommend them as universal Cure-alls, but simply for what their name purports, viz.:

THE VERMIFUGE,
For expelling Worms from the human system. It has also been administered with the most satisfactory results to various Animals subject to Worms.

THE LIVER PILLS,
For the cure of LIVER COMPLAINTS, all Bilious Derangements, Sick Head-Ache, &c. In cases of

FEVER AND AGUE,
preparatory to or after taking Quinine, they almost invariably make a speedy and permanent cure.

As specifics for the above mentioned diseases, they are Unrivalled, and never known to fail when administered in accordance with the directions.

Their unprecedented popularity has induced the proprietors,
FLEMING BROTHERS,
Pittsburgh, Pa.,

to dispose of their Drug business, in which they have been successfully engaged for the last Twenty Years, and they will now give their undivided time and attention to their manufacture. And being determined that Dr. McLANE'S Celebrated Vermifuge and Liver Pills shall continue to occupy the high position they now hold among the great remedies of the day, they will continue to spare neither time nor expense in procuring the Best and Purest material, and compound them in the most thorough manner. Address all orders to

FLEMING BROS., Pittsburgh, Pa.
P. S. Dealers and Physicians ordering from others than Fleming Bros., will be supplied with inferior quality of the Vermifuge and Liver Pills, and will be liable for any injury to the system that may result from the use of the same.

THE VERMIFUGE AND LIVER PILLS
are sold by all the leading Druggists and Dealers in the United States, and by all the leading Druggists and Dealers in the City of Pittsburgh.

PURE MALT WHISKY.

The undersigned has just received a LARGE QUANTITY OF

PURE MALT WHISKY.

THIS IS AN ARTICLE RARE TO BE FOUND.

HE HAS ALSO,

Rye Whisky, Mor on's Proof, Rum, Gin, Brandy,

Old Tom, Wines, &c., &c.

A CHOICE SELECTION OF BLACK TEA, GUNPOWDER TEA, HYSON, &c., &c.

Coffee Roasted and Ground, DAILY.

He has also LATELY ADDED to his Stock a large quantity of

CROCKERY,

WHICH HE IS PREPARED TO SELL CHEAP.

Call at the Glasgow Tea and Coffee Warehouse, Bridge Street.

JOHN COOK, PROPRIETOR.

Belleville, August 10th, 1859.

Facts for Farmers.

GIVE US MORE MUTTON.

Mutton, we said, not that mass of thin, wiry

muscle tough enough for new hides, that is

sometimes offered us in the shape of mutton-

the product of a sheep's carcass.

This article is designed for other topics; it is

admittedly adapted to its office; but if it is

of the value of the article, it is a notable prerogative

of the gift of Providence. We have quite

enough of our article.

But of mutton, well grown and still fed,

the fact is distributed through the land

as well as in the city, we have but for

too little. Of all mutton, as a standard

quality, we commend us to this. This mutton,

well clothed, makes a splendid mutton; the

quarters are available for soup and stew,

and the leg, boiled with a piece of pork,

is a most delicious and wholesome dish.

Stew, the price of farmers' mutton,

is a good article, but it is not long enough

to be sold for mutton. It is a popular and whole-

some dish—probably the most beneficial of

mutton for individual use.

It ought to be cheaper, and can be.

The sheep is a wool-bearing animal, and it is

nearly for the fleece that it is raised. It has

been cultivated until within twenty years

The South Downs and the coarse woolled

swains are large and so highly esteemed for

their flesh—have not been in favor for

their flesh. Mutton, we believe, can be

produced at much less expense than either

pork or beef. During summer they will

thrive in pastures where corn would grow

poorly, and in the fall and winter they

will give better returns in flesh, for the

corn and grain, than any other animal.

Most of the sheep killed are only grass fed.

Still feeding improves the flesh as much as

that of beef. It pays well to keep up a

stock of South Down grades or other large

boiled sheep, in the fall, and fatten them

for market. They want a dry place, with a

good shelter against storms. The stable

feed may be good, clover hay and turnips

in addition—if you can get it—half a

pound of oil cake adds a pint of barley

per day, to each animal, and they should have

constant access to a good clean running wa-

ter—American Agriculturist.

NOTES ON MANURES, &c.

LIQUID MANURES.—It is true, that the

greater portion of our liquid manure is waste-

ful, and it is also true that this is the most

valuable part of the excrement of animals.

These two facts are admitted, the necessity

for collecting it at once appears. In Holland

not only is the liquid manure carefully pre-

served, but the solid manure is mixed with

water, and applied to the land in a liquid

form. This, we have experienced with

liquid manure in growing fine vegetable

crops, is its value. It is a power in the

hands of the skillful gardener. We have

planted fruit trees from the liquid manure

of the stable, and they have grown up in

the convenient form, have succeeded in

perfecting a large crop of fruit (more than

enough to pay for the tree) the first year

and without doing any thing but to keep

the trees in the liquid manure. The first

year the trees, which the liquid manure

had been growing in, were sold for more

than the trees which had been growing in

the soil. The trees which had been growing

in the soil, were sold for less than the

trees which had been growing in the li-

quid manure. The trees which had been

growing in the liquid manure, were sold

for more than the trees which had been

growing in the soil. The trees which had

been growing in the liquid manure, were

sold for more than the trees which had

been growing in the soil. The trees which
